

5Z HEALTHY COMPANY THE PROCESS

LOGIN

The first step is to join the 5Z Culture. To do so, the membership fee must be paid

SELF-DIAGNOSIS

The company receives a one-year access to the Sabentis platform where the 5Z self-diagnosis can be carried out.

*The software enables the planning of actions to resolve non-compliance findings

PERFORMANCE GRAPH

The **FiORP** team of experts analyse the information based on the results of the self-diagnosis to prepare a document about the state of the company's management in the 5 major areas defined by **ORP**.

PRESENTATION OF RESULTS

The **FiORP** team of experts then present the results of the performance graph to senior management for joint strategic planning.

*Additional cost applies.

ACTION PLAN

The company must plan corrective/preventive actions to address any and all opportunities for improvement; this can be done through the Sabentis 5Z platform.

AUDIT

If the company has reached the minimum score in the self-diagnosis (+3500 points) and has made headway in the corrective action plan, it is awarded the certification audit by **FiORP**.

EVALUATION OF RESULTS

If the company scores 3500 points or more, it is awarded the Healthy Company Certificate 5Z Transparent Seal; if it scores 4200 points or more, it is awarded the certificate of a 5Z Healthy Company Seal of Excellence.

ONGOING IMPROVEMENT

The company that has not reached the minimum score in both the self-diagnosis and the audit, can, for the duration of their membership implement the corrective action plan to improve their performance and follow up with a new self-diagnosis to qualify for the certification process.
